

KVM & Console Solutions

OVERVIEW

With **Raritan's powerful KVM solutions**, organizations can view and manage multiple servers and network devices from one or more centralized user consoles; each consisting of a single keyboard, video monitor and mouse.

Raritan's Solutions from SOHO to Enterprise

EZ switch, provides solution for SOHO and SMB segment available in 8 & 16 port models. A high quality durable system to control 8 or 16 computers connected through 4 in 1 cable. (PS2 or USB mouse, PS2 or USB keyboard and monitor).

MCCAT/MCIP provides solution for small to midsize server room or data center is getting too cluttered; consolidate your equipment with a Raritan Master Console CAT or Master Console IP This switch lets you eliminate costly, redundant equipment by giving one user centralized control from a single workstation or Remote individual models control up to 8 or 16 servers, and switches can be cascaded to control up to 256 servers at distances of up to 150 feet.

LCD KVM Console solution is an integrated, 1 U devicee than manages servers in data centers, server rooms and other space critical environments directly from the racks in which they are installed. Support Multiple Data Center Configurations.

T1700 KVM Console Drawer with a 17-inch LCC flat panel display, keyboard and touchpad pointing device and T1 900 KVM Console Drawer with a 19-inch LCD flat panel display keyboard and touchpad pointing device.

The T1700 and T1900 integrate seamlessly with other Raritan solutions, offering Powerful access to servers and other network devices in the data center.

KVM & Console Solutions

Paragon® II is Raritan's second generation, battle-tested, secure Cat5 analog KVM solution with the industry's best video performance. It offers higher video resolution over greater distances, non-blocked access for up to 64 users and thousands of multiplatform servers, optional IP access and centralized management plus secure, Smart Card technology.

Dominion® KX II is Raritan's enterprise-class, secure KVM-over-IP switch that provides BIOS-level access and control of up to 64 multiplatform servers. Dominion KX II offers standard features such as Virtual Media and dual power, that maximize performance, security, reliability and versatility

Dominion SX is a secure console server with SSH and Web-based access for monitoring and controlling multiple serially-managed servers, network devices and powerstrips from anywhere

CC-SG provides IT organizations with integrated, secure and simplified access and BIOS-level control of all technology platforms even in remote locations lowering the cost of purchasing, implementing and maintaining additional access points and eliminating truck rolls. By offering a consolidated view from a single point of access, it helps streamline operations, improves staff efficiency by saving time when responding to trouble tickets and helps users be more proactive so expensive fixes can be avoided. Designed for midsize to enterprise data center operations, this feature-rich Linux-based appliance also includes: Secure Gateway Centralized access and control of your entire IT infrastructure

Raritan's solutions are standards-based and fit in seamlessly with current infrastructure deployments.
